Exercise 1

IMAGE RESOURCES

The **image collection** you are borrowing elements from is as follows:

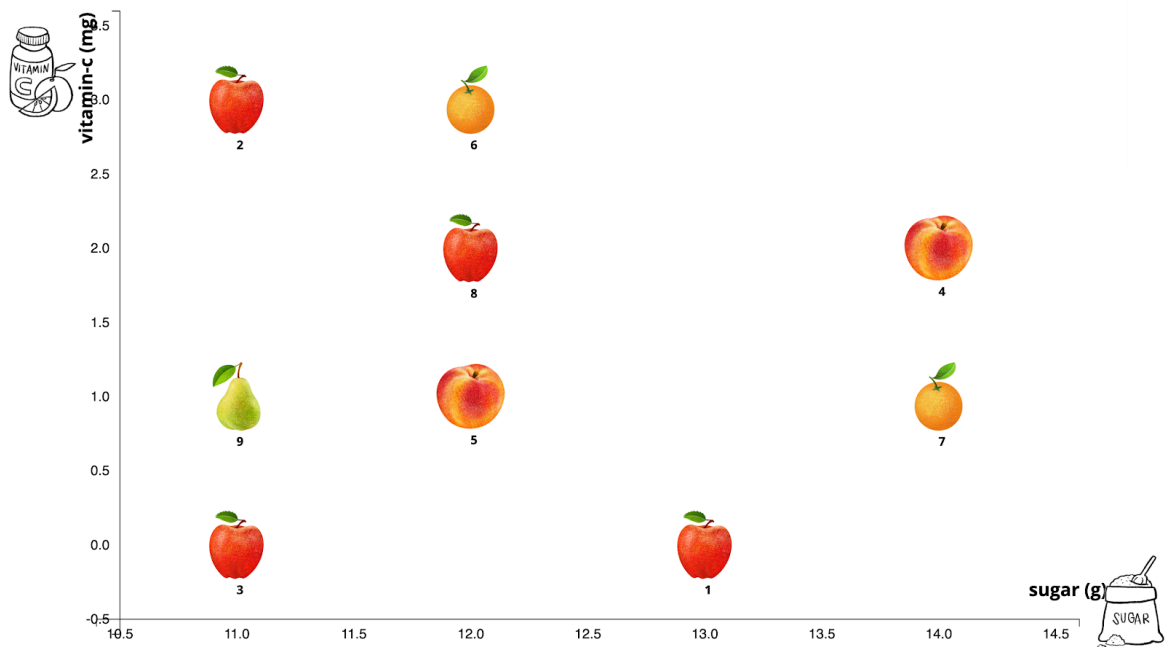

INSTRUCTIONS

Build a scatterplot showing **sugar (x-axis)** against **vitamin-c (y-axis)** for the different juices. Differentiate the juices by **fruit type (glyph)** as follows:

Apple =   Orange =   Pear =   Peach =

Add **decorative elements** to embellish the axes in the visualization: add a sugar bag glyph to represent the x-axis; and add a vitamin C glyph for the y-axis.

TARGET VISUALIZATION

The **target visualization** you are asked to replicate is as follows:

Let the experimenter know when you are done with this exercise.
